

Final Certification Exam

Forty questions spanning every module. A mark of 70% (28/40) or higher is required to achieve certification.

This exam draws on all ten modules. Answer all 40 questions, then check your answers against the Answer Key at the end of the course. A mark of 70% (28 correct answers) or higher is required to achieve certification.

1. AI governance is best described as:

- A. A replacement for ethical reasoning
- B. A purely legal compliance function
- C. An optional extra for large retailers
- D. The organisational structures that make ethical commitments consistent and accountable

2. Across the fashion value chain, AI is now used in:

- A. Design, marketing, buying, e-commerce, supply chain and recruitment
- B. E-commerce recommendations only
- C. Back-office finance only
- D. Warehouse robotics only

3. In the Shein litigation, designers alleged the company's algorithm:

- A. Generated wholly original designs
- B. Identified trending designs online and reproduced them, in some cases as exact copies
- C. Only analysed internal sales data
- D. Was never actually used

4. UK and US copyright law generally protects:

- A. A general style or trend
- B. Silhouettes and shapes
- C. The specific original expression of an idea, such as a print
- D. Nothing in fashion

5. The recommended governance fix for generative design tools is:

- A. Banning them outright
- B. Relying on vendor assurances
- C. No fix is needed
- D. A human, documented originality checkpoint before production

6. The central criticism of Levi's AI-generated models announcement was:

- A. Framing a cost-saving decision as a diversity initiative instead of hiring diverse models
- B. The image quality was poor
- C. It breached UK GDPR
- D. The AI vendor was unlicensed

7. Levi's eventually clarified that AI models were:

- A. A complete replacement for photoshoots
- B. Not a means to advance diversity or a substitute for real DEI action
- C. A legal requirement
- D. Cheaper but equally inclusive

8. The key issue in the Vogue/Guess AI model advertisement was:

- A. It broke advertising rules
- B. The product was misrepresented
- C. Readers had no way of knowing the model was AI-generated unless told
- D. The model was underpaid

9. The shared lesson from the Levi's and Vogue/Guess cases is:

- A. Never use AI imagery
- B. Advertising is exempt from ethical scrutiny
- C. Cost should drive creative decisions
- D. Ask before publication how the audience will react to finding out afterwards, and disclose

10. Data drift refers to:

- A. Real-world inputs shifting away from the data a model was trained on
- B. A model being deliberately retrained
- C. Data being lost in transfer
- D. Customers changing their addresses

11. Social failure modes are easy to miss because:

- A. They are rare
- B. By every internal technical measure, the system appears to be performing correctly
- C. They only affect staff
- D. Regulators do not monitor them

12. Proxy discrimination in retail commonly arises through:

- A. Explicitly recording ethnicity
- B. Random model error
- C. Variables like postcode, device and browsing behaviour that correlate with protected characteristics
- D. Customer self-declaration

13. Automation bias describes:

- A. Models running faster than humans
- B. Regulators favouring automated systems
- C. Data drifting over time
- D. People deferring to a system's output even when their own judgement suggests otherwise

14. Review depth for a retailer's AI systems should be:

- A. Proportional to each system's potential impact on individuals
- B. Identical across all systems
- C. Decided by the vendor
- D. Applied only to customer-facing systems

15. Which UK GDPR principle is engaged when data collected for orders is reused to train an unrelated model?

- A. Accuracy
- B. Purpose limitation
- C. Storage limitation
- D. Accountability

16. Special category data in fashion retail can arise from:

- A. Any purchase record
- B. Loyalty points balances
- C. Maternity and adaptive ranges, religious dress, and systems inferring body or health data
- D. Delivery addresses

17. Article 22 of the UK GDPR concerns:

- A. Data breach reporting
- B. International transfers
- C. Cookie consent
- D. The right not to be subject to certain solely automated decisions

18. Safeguards required under Article 22 include:

- A. The right to human intervention, to express a view, and to contest the decision
- B. A refund entitlement
- C. Automatic data deletion
- D. A discount on future orders

19. A DPIA is mandatory before processing that is likely to result in:

- A. Any commercial benefit
- B. A high risk to individuals
- C. A reduction in costs
- D. An increase in data volume

20. The Data (Use and Access) Act 2025 renamed the ICO as the:

- A. Data Protection Authority
- B. Digital Markets Unit
- C. Information Commission
- D. Office for AI

21. The practical test for personalisation crossing an ethical line is:

- A. Whether it increases revenue
- B. Whether competitors do it
- C. Whether it uses machine learning
- D. Whether the customer would be comfortable if the mechanism were fully explained

22. Targeting based on inferred financial distress or body insecurity is:

- A. The clearest line in retail marketing, and one fashion is unusually exposed to
- B. Standard practice and acceptable
- C. Only an issue for financial services
- D. Permitted with a privacy notice

23. AI-generated “only 2 left” messaging not tied to real stock is:

- A. Acceptable if automated
- B. Potentially an unfair commercial practice through materially misleading urgency
- C. Exempt from consumer law
- D. Required for conversion optimisation

24. Disclosure of AI-generated influencer content should appear:

- A. In the profile bio
- B. In terms and conditions
- C. Prominently in the content itself
- D. It is not required

25. Recommendation feedback loops most commonly disadvantage:

- A. Best-selling core lines
- B. Clearance stock
- C. Premium ranges
- D. New, niche, adaptive and extended-size ranges

26. Low sales history for a product range may indicate:

- A. Low exposure rather than low demand, if the range was never surfaced equally
- B. Proven low demand in all cases
- C. A pricing error
- D. Supplier failure

27. The core risk of automation bias in forecasting is:

- A. Models are frequently wrong
- B. Nobody is positioned to notice when a model is wrong
- C. Forecasts are slow
- D. Buyers override too often

28. Dynamic pricing should be tied to:

- A. Inferred individual willingness to pay
- B. Customer postcode
- C. Legitimate factors such as stock, season and competitor pricing
- D. Browsing device type

29. Amazon's AI recruiting tool failed because:

- A. It was technically unreliable
- B. It was too slow
- C. Regulators blocked it
- D. Trained on predominantly male historical hiring data, it learned to penalise female candidates

30. Indirect discrimination under the Equality Act 2010 requires:

- A. No intent — only that a practice disadvantages a protected group without objective justification
- B. Proof of intent
- C. An explicit protected characteristic input
- D. A tribunal ruling first

31. Video-interview analysis tools warrant caution because they can:

- A. Take too long to run
- B. Disadvantage neurodivergent and disabled candidates and complicate reasonable adjustments
- C. Only assess technical skills
- D. Not process video reliably

32. The single most effective bias control in recruitment AI is:

- A. A larger training dataset
- B. Anonymising CVs entirely
- C. A human reviewing before any candidate is rejected
- D. Using multiple vendors

33. Adverse-impact testing for recruitment AI should be run:

- A. Once, by the vendor
- B. Only if a complaint is received
- C. Only for senior roles
- D. On your own applicant pool, before launch and on a schedule afterwards

34. The CMA Green Claims Code requires environmental claims to be:

- A. Truthful, substantiated, full-lifecycle and free of misleading omissions
- B. Approved by the CMA in advance
- C. Limited to carbon only
- D. Reviewed annually

35. “AI-powered sustainable design” as a public claim is:

- A. Fully compliant
- B. Vague and unsubstantiated where specific evidenced claims are required
- C. Required disclosure
- D. Acceptable if AI was genuinely used

36. A net sustainability claim about AI must account for:

- A. Only the measured reduction
- B. Competitor benchmarks
- C. AI's own energy footprint from training and running models
- D. Supplier marketing claims

37. AI-compiled ESG reporting carries the risk that it:

- A. Runs too slowly
- B. Cannot aggregate data
- C. Always overestimates emissions
- D. Produces confident, well-formatted outputs regardless of input data quality

38. Module 10 identifies which step as usually the highest-value first move?

- A. Building an AI inventory, since most organisations run more AI tools than they have counted
- B. Appointing a chief AI officer
- C. Buying a governance platform
- D. Publishing an ethics statement

39. “Named accountability” means:

- A. A committee owns each system
- B. Each system has one named owner
- C. The board owns all systems
- D. The vendor is accountable

40. The recurring question across this entire course is:

- A. What is the return on investment?
- B. Which vendor is cheapest?
- C. Who could this affect, how would we know if it caused harm, and who is accountable?
- D. How quickly can we deploy?

Answer Key

Use this key to mark your module check-in quizzes and your Final Certification Exam.

Module 1 Quiz

1. B	2. C	3. D	4. A	5. B
------	------	------	------	------

Module 2 Quiz

1. C	2. D	3. A	4. B	5. C
------	------	------	------	------

Module 3 Quiz

1. D	2. A	3. B	4. C	5. D
------	------	------	------	------

Module 4 Quiz

1. A	2. B	3. C	4. D	5. A
------	------	------	------	------

Module 5 Quiz

1. B	2. C	3. D	4. A	5. B
------	------	------	------	------

Module 6 Quiz

1. C	2. D	3. A	4. B	5. C
------	------	------	------	------

Module 7 Quiz

1. D	2. A	3. B	4. C	5. D
------	------	------	------	------

Module 8 Quiz

1. A	2. B	3. C	4. D	5. A
------	------	------	------	------

Module 9 Quiz

1. B	2. C	3. D	4. A	5. B
------	------	------	------	------

Module 10 Quiz

1. C	2. D	3. A	4. B	5. C
------	------	------	------	------

Final Certification Exam (Q1–20)

1. D	2. A	3. B	4. C	5. D
6. A	7. B	8. C	9. D	10. A
11. B	12. C	13. D	14. A	15. B
16. C	17. D	18. A	19. B	20. C

Final Certification Exam (Q21–40)

1. D	2. A	3. B	4. C	5. D
6. A	7. B	8. C	9. D	10. A
11. B	12. C	13. D	14. A	15. B
16. C	17. D	18. A	19. B	20. C
